

REFeree 2

Recommendation: Major revisions (the kind that take a year).

General comments:

"The author appears to have discovered that galaxies are, in fact, very far away. While true, this is not novel."

"Figure 4 is a triumph. Figures 1, 2, 3, 5, 6, 7 and 8 are not."

"I did not read the appendix. Nobody reads the appendix."

"Have you considered that the gas is simply hiding?"

Minor comments: 47 attached (see following 12 pages, omitted here for your own sanity).
